

## ABSTRAK

*This study aims to analyze the accounting information system at PT. Sun Premier and internal control systems on inventory at PT. Sun Premier has been effective. This type of research is a case study. The research method used is descriptive qualitative. Data collection techniques used are interview, observation, and documentation data collection techniques. The results of the study show that the accounting information system applied at PT. Sun Premier such as the tasks that have been carried out and the recording and reporting system regarding inventory management activities is less effective. Based on the practices that occur in the inventory of PT. Sun Premier, the situation is still not in accordance with the theory, but the company is able to run an accounting information system on inventory well.*
