

Reviewer A:

Detailed Comments:

This paper is quite interesting, especially on post-pandemic condition

Detailed Suggestions:

The author should summarize the findings on table

Final decision of reviewer is::

Accepted with revision

Reviewer B:

Detailed Comments:

Overall, the research topic and result are quite interesting, but the authors should consider and revise some of the comments to increase the quality of the paper and more contribute to the literature and society

Detailed Suggestions:

The authors should remake the abstract section to be more interesting in order to grab the reader's attention and also write this paper in a "scientific style".

In some parts of the paper, still lack of literacy. Authors should enrich the literacy used to improve the quality of the paper. (Add reputable indexed supporting literature in the last 5 years, 2018-2022)

The research protocols and systematic review method need to be explained and justified in more detail based on supporting literature.

The result of the research is interesting, but to be more comprehensive and interesting to describe the results, the authors should develop a framework/model to summarize the results.

Contributions of the research for academics, practice, and society is missing.

Final decision of reviewer is::

Accepted with revision
